

Investor Presentation

August 2021

A VITAL LINK
IN HEALTHCARE

Cautionary Note Regarding Forward-Looking Information

This presentation contains “forward-looking information” and “forward-looking statements” (collectively, “forward-looking information”) within the meaning of applicable securities laws. Forward-looking information may relate to our future financial outlook and anticipated events or results and may include information regarding our financial position, business strategy, growth strategies, addressable markets, budgets, operations, financial results, plans and objectives. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as “plans”, “targets”, “expects” or “does not expect”, “is expected”, “an opportunity exists”, “budget”, “scheduled”, “estimates”, “outlook”, “forecasts”, “projection”, “prospects”, “strategy”, “intends”, “anticipates”, “does not anticipate”, “believes”, or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might”, “will”, “will be taken”, “occur” or “be achieved”. In addition, any statements that refer to expectations, intentions, projections or other characterizations of future events or circumstances contain forward-looking information. Statements containing forward-looking information are not historical facts but instead represent management’s expectations, estimates and projections regarding future events or circumstances. This forward-looking information and other forward-looking information are based on our opinions, estimates and assumptions in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors that we currently believe are appropriate and reasonable in the circumstances. Despite a careful process to prepare and review the forward-looking information, there can be no assurance that the underlying opinions, estimates and assumptions will prove to be correct. Certain assumptions in respect of our ability to execute our growth strategies; our ability to retain key personnel; our ability to maintain and expand geographic scope; our ability to obtain financing on acceptable terms; interest rates; the impact of competition; the changes and trends in our industry or the global economy; and the changes in laws, rules, regulations, and global standards are material factors made in preparing forward-looking information and management’s expectations.

When relying on forward-looking statements to make decisions, we caution readers not to place undue reliance on these statements, as forward-looking statements involve significant risks and uncertainties and should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not the times at or by which such performance or results will be achieved. For further details on the forward-looking information included in this presentation, see “Cautionary Note Regarding Forward-Looking Information” in Andlauer Healthcare Group’s Annual Information Form (“AIF”) dated February 24, 2021 and the Company’s most recent Management Discussion & Analysis (“MD&A”). A number of factors could cause actual results to differ, possibly materially, from the results discussed in the forward-looking statements. Prospective investors should carefully consider the risk factors described in the Company’s AIF and most recent MD&A, before making an investment decision. The Company’s AIF and most recent MD&A are filed on SEDAR and posted on the Company’s website.

Certain statements included in this presentation may be considered a “financial outlook” for purposes of applicable Canadian securities laws, and as such, the financial outlook may not be appropriate for purposes other than this presentation. All forward-looking information in this presentation is made as of the date hereof. Except as expressly required by applicable law, we assume no obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise. All of the forward-looking information contained in this presentation is expressly qualified by the foregoing cautionary statements.

Non-IFRS Measures and Industry Metrics

This presentation makes reference to non-IFRS measures, including “EBITDA” and “EBITDA Margin”. These non-IFRS measures do not have standardized meanings prescribed by IFRS and therefore may not be comparable to similar measures presented by other companies. They are used to provide investors with supplemental measures of our operating performance and thus highlight trends in our core business that may not otherwise be apparent when relying solely on IFRS measures. We also believe that securities analysts, investors and other interested parties frequently use non-IFRS measures in the evaluation of issuers. Our management will also use non-IFRS measures and in order to facilitate operating performance comparisons from period to period, to prepare annual operating budgets and forecasts and to determine components of management compensation. Please refer to the Company’s most recent MD&A for further discussion of these non-IFRS financial measures and for a reconciliation to comparable IFRS measures, including net income and comprehensive income.

Market and Industry Data

This presentation includes market and industry data and forecasts that were obtained from third-party sources, industry publications and publicly available information as well as industry data prepared by management on the basis of its knowledge of the healthcare logistics and transportation services industry in which we will operate (including management’s estimates and assumptions relating to the industry based on that knowledge). Management’s knowledge of the healthcare logistics and transportation services industry has been developed through its experience and participation in the industry. Management believes that its industry data is accurate and that its estimates and assumptions are reasonable, but there can be no assurance as to the accuracy or completeness of this data. Third-party sources generally state that the information contained therein has been obtained from sources believed to be reliable, but there can be no assurances as to the accuracy or completeness of included information. Although management believes it to be reliable, we have not independently verified any of the data from management or third-party sources referred to in this presentation, or analyzed or verified the underlying studies or surveys relied upon or referred to by such sources, or ascertained the underlying economic assumptions relied upon by such sources.
